

JACK JAMES

Computer Science Student

083 466 8654 | JackAnthonyJames006@gmail.com | github.com/JackJames-CS | Julianstown, Co. Meath

PROFILE

Second-year Computer Science student at Maynooth University pursuing a BSc in Computer Science & Software Engineering – a four-year programme accredited by the Irish Computer Society with a six-month industry placement. Strong foundation in programming, algorithms, and software design with hands-on experience in Java, Python, SQL, and web technologies. Highly motivated to apply technical skills in a professional technology environment and eager to learn from industry mentors.

EDUCATION

BSc Computer Science & Software Engineering

2024 – 2028

Maynooth University – Currently in Second Year

• Data Structures & Algorithms	• Operating Systems & Concurrency
• Object-Oriented Programming (Java)	• Databases & Data Modelling
• Software Design & Design Patterns	• Web Information Processing
• Software Engineering & SDLC	• Computer Architecture
• Software Testing & QA	• Statistics & Probability

Leaving Certificate

2018 – 2024

St. Oliver's Community College, Drogheda

TECHNICAL SKILLS

Languages	Java, Python, SQL, HTML/CSS, JavaScript
Tools	VS Code, Git & GitHub, Linux/Unix CLI
Concepts	OOP, Agile/SDLC, Database Design, UML, Unit Testing, Design Patterns

EXPERIENCE

Crew Member – Burger King

2024 – Present

- Deliver fast, accurate service in a high-pressure environment; follow strict operational procedures while maintaining clear, friendly customer communication.

Barista – Rumbles Restaurant

2023 – 2024

- Prepared drinks and handled transactions during high-volume events, demonstrating strong teamwork, multitasking, and customer service skills.

ACHIEVEMENTS

• Technology Student of the Year	• Student of the Year (6th Year)
• Chess Team Captain	• Spirit of TY Award 2022
• Solo Traveller	

Projects

Weather Data Tool – Html, CSS, JavaScript, API

- A browser-based weather app that fetches real-time weather data by city, displaying temperature, humidity, local time, sunrise and sunset. Features include °C/°F toggling, a recent searches history. Taught me how to work with REST APIs, handle asynchronous JavaScript, and manage application state across multiple views.

Available on GitHub — github.com/JackJames-CS/Weather-API-Project

Module Grades Calculator - Java

- A command-line tool for calculating module grades and overall result based on exam and CA marks. Supports adding, viewing and removing modules. Taught me object-oriented design in Java, working with Array Lists, and building a clean menu-driven interface.
