PROFILE

Third-year Computer Science student at Maynooth University. Database and research lead on a six-person, Microsoft-mentored team that built a full-stack app end to end, from a Spring Boot backend deployed on Azure with PostgreSQL/PostGIS to a React Native front end. Occasionally worked with AI coding tools and LLMs to plan, build, debug and review software quickly, while understanding and owning the code that ships. Seeking a six-month placement starting January 2027.

EDUCATION

BSc Computer Science & Software Engineering 2024 – 2028

Maynooth University | Currently in Third Year | First Year 80% · Second Year 69% (2.1)

- Data Structures & Algorithms
- Object-Oriented Programming (Java)
- Databases & Data Modelling
- Operating Systems & Concurrency
- Web Information Processing
- Software Design & Design Patterns
- Programming Languages & Compilers
- Computer Networks
- Software Testing & Verification
- Computation & Complexity

Leaving Certificate 2018 – 2024

St. Oliver's Community College, Drogheda

MICROSOFT-MENTORED PROJECT

Database & Research Lead — Placemark Feb – May 2026

Maynooth University × Microsoft | Location review app | Spring Boot, PostGIS, Azure, React Native

- **Selected through a competitive application** as one of four student teams mentored by Microsoft engineers, with weekly sprint reviews over a 12-week project.
- **Owned the database:** designed the PostgreSQL / PostGIS schema (six tables, versioned migrations) and deployed it to Azure, including the spatial queries behind nearby-place search.
- **Designed the standout feature:** push notifications when a user is within 250 m of a place a friend rated 4★ or higher, driven by a single SQL query with a cooldown.
- **Kept the team aligned:** lead presenter for the final live demo at Microsoft Ireland, resolved a Week 3 split into two backends by consolidating onto one Spring Boot API, and managed Azure deployment and Entra credentials.

TECHNICAL SKILLS

Languages	Java, TypeScript, JavaScript, Python, SQL, HTML/CSS
Frameworks & Data	Spring Boot, React, React Native (Expo), Node.js, PostgreSQL / PostGIS, Supabase
Cloud & Tools	Microsoft Azure (App Service, Blob Storage, Entra ID), Vercel, Git & GitHub, Maven, Linux CLI
AI Tools	Claude Code and LLM coding assistants for AI-assisted development, debugging and code review
Concepts	REST API design, OAuth2 / JWT, spatial data modelling, unit testing, Agile / SDLC, design patterns, UML

PROJECTS

WC26 Sweepstakes Dashboard | JavaScript, HTML/CSS, GitHub Pages

- Live wall dashboard for a family World Cup 2026 sweepstakes: group tables, knockout bracket, golden boot and a live match banner, driven from a structured data file.

Earlier Projects | github.com/JackJames-CS

- Weather Data Tool (JavaScript, REST API) with live data, unit toggling and search history; Module Grades Calculator (Java, OOP) command-line tool.

WORK EXPERIENCE

Food & Beverage Assistant — Dunboyne Castle Hotel & Spa

Jun 2026 – Present

- Work across the bar, cocktail bar, restaurant and large events including weddings and debbs, serving high volumes and wide variety of guests .
- Rotate between teams as needed (bar, restaurant food running, conference & banqueting) under different supervisors, adapting quickly to new workflows and expectations under pressure.

Crew Member, Supervisor — Burger King

2024 – May 2026

- Trusted to open and close the store and run shifts solo; coordinated the team and trained new crew on procedures and standards.

ACHIEVEMENTS

- | | |
|----------------------------------|----------------------------------|
| • Technology Student of the Year | • Student of the Year (6th Year) |
| • Chess Team Captain | • Spirit of TY Award 2022 |
| • Full clean driving licence | • Solo traveller |
